PROFILE SUMMARY

Computer Science Engineering student specializing in AI/ML and IoT with strong foundations in data structures, algorithms, full-stack development, REST APIs, debugging, and software testing. Experienced in building scalable web applications, AI automation platforms, IoT systems, and database-integrated solutions using modern technologies.

EDUCATION

- **GLA University** Mathura, India
B.Tech in Computer Science Engineering; Specialization: AI/ML & IoT 2023 – 2027
- **Kanha Makhan Public School** Mathura, India
Senior Secondary Education, Class XII 2023
- **Kanha Makhan Public School** Mathura, India
Secondary Education, Class X 2021

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, TypeScript, C++, SQL, HTML, CSS
- **Core Concepts:** Data Structures and Algorithms, OOP, DBMS, Software Development, Debugging, Testing
- **Frameworks and Libraries:** React.js, Next.js, Node.js, Express.js, TensorFlow, PyTorch, OpenCV
- **Tools and Platforms:** Git, GitHub, Docker, Linux, REST APIs, Firebase, MongoDB, Arduino, IoT Systems
- **Coding Profile:** Solved 112+ problems on LeetCode

EXPERIENCE

- **Student Welfare Platform – GLA University** Mathura, India
Full Stack Developer 2025 – Present
 - Developed a university welfare platform with frontend, backend integration, authentication, and scalable architecture.
 - Built reusable UI components, REST APIs, and database-integrated modules using modern web technologies.
 - Worked on debugging, testing, optimization, and deployment while maintaining clean and modular code.
 - Deployed project demo at gladsw.cloud.

PROJECTS

- **Nirmaan – Multi-Agent AI Platform:** Built an intelligent automation platform with AI agents, workflow orchestration, API integrations, retry handling, and task automation for students. Tech Stack: Next.js, Node.js, APIs, AI Agents. GitHub: github.com/Yashika-2806/nirmaan
- **Promptathon:** Developed an AI-based polling and campus interaction system for students and faculty with user-friendly workflows and intelligent features different from the existing solutions. Tech Stack: Node.js, APIs, AI Agents, MongoDB. GitHub: github.com/Yashika-2806/promptathon
- **Smart Home Automation System:** Built an IoT-based automation prototype using sensors, actuators, Arduino, and real-time device communication for fire detection, automatic tap control, and soil moisture monitoring.

RESEARCH AND PUBLICATIONS

- **Research Paper in Progress:** Multi-Agent AI Systems for Autonomous Workflow Automation using distributed intelligent agents.

CERTIFICATIONS

- **AI and Cloud:** Fundamentals of Building AI Agents – Coursera; Introduction to Large Language Models – Coursera; Generative AI – Databricks
- **Database and CS:** Oracle Database Professional Certification; Pursuing NPTEL Domain Certification and Harvard CS50 Certification

ACHIEVEMENTS

- Secured **1st Position** in GLAU Shark Tank among 50+ teams with a startup prototype.
- Secured **2nd Position** in Digital Storytelling Competition integrating culture with technology.
- Won consolation prize at AI Summit GLA Noida among 100+ teams.
- Secured **1st Position** in IBM ICE Day Technical Poster Presentation.
- Achieved top rank in IBM ICE Day Technical Quiz competition.
- Secured **2nd Position** in Tech Expo Prototype Challenge for Smart Home Automation project.
- Participated in Innovative Bharat 3.0 innovation initiative.
